

Dear New Students and their Guardians,

## **Request of a Contribution to The NUT SOCIETY OF EDUCATIONAL PROGRAM**

Congratulations on your success in the entrance exam and welcome to Nagaoka University of Technology.

Ever since its establishment, the University has been pursuing to foster leading engineers with practical skills, originality and flexible responsibility to change of society in future through our unique integrated curriculum, which provides a unified course of study from the undergraduate years to graduate studies.

In the recent years, Nagaoka University of Technology (NUT) is recognized with remarkable achievements as NUT was appointed to various projects. In 2023, NUT was selected for two projects: Projects related to facility development for Ministry of Education, Culture, Sports, Science and Technology (MEXT); and the other, "Project for Enhancing the Environment to Create Innovation in Regional Core Universities" for Cabinet Office.

Over the years, the University has been constantly pursuing unique and enthusiastic international exchange activities such as the twinning program, double degree program, sending Japanese students overseas through long-term internship program, and so on. Through these programs, Nagaoka University of Technology continues to promote GIGAKU (Science of Technology) and to extend its international collaborations in education and research to foster future engineers who go on to play innovative roles all around the world.

On October 1, 2026, the University will celebrate its 50th anniversary. As the University reaches a major milestone, it will keep in mind the spirit of NUT's motto, "VOS": V stands for Vitality, which refers to the energy to carry out the never-ending feedback between theory and practice; O stands for Originality, which signifies the cultivation of creative abilities in GIGAKU; and S stands for Services, which means to contribute to the happiness and sustainable development of humanity by the use of GIGAKU. Under this approach with VOS, NUT aims to become an indispensable university for both local and global communities by deepening its "university of ideas".

The NUT Society of Educational Program was founded with generous donations from parents and guardians of our students, aiming to support and promote welfare programs to benefit students, strengthen their friendship, and to contribute to the university's education and research. Ever since then, the Society has been playing a significant role in supporting various activities and projects of the University.

In order to continue to promote and support the University's activities and projects, we would like you to understand our sublime program and to donate a 20,000-yen contribution. We also would like to take the liberty of deducting it from bank account with tuition upon your agreement. We deeply appreciate you for kindly considering our request to team up with our society for raising funds. If you have any queries regarding our society, please feel free to contact us.

Sincerely yours,  
Executive Director, NUT Society of Educational Program
